

Education & Community Outreach: As noted in the Permaculture Team report, we have arranged to do adult Ed courses at Waterville and Lawrence. Bill will do a course based on plant-based diets at in Waterville. The Earthway's Sampler will include a session on waste management, acorn harvesting, and plant-based diets. A discussion on use of trees and landscape design was initiated at our latest meeting. Ideas were tossed around about how to get builders interested in this concept. We discussed our assistance that will be available to assist with curriculum for the Energy Team weatherization project and also reviewed ideas for how too get low-income populations interested in weatherization. Other discussion was on the ill-effects of chemicals used in food production. Our next meeting will be August 15 at 9am at Linda's lake house!
